

Erasmus in University of Pécs (Pécsi Tudományegyetem) MLBS BSP student`s Annija Trubiņa story

I spend my ERASMUS semester in Hungary, Pécs. It was amazing experience and probably the best time in my life so far. I met many interesting people from all over the world and spend the most amazing time with them. Living in international environment with friendly and open-minded people made me look at things differently and enjoy every minute of precious time. Traveling, multicultural dinners, doing sport, exchanging experiences, taking part in different activities organized by ESN and what not... There was no time to get bored!

As to studies, courses were held in English, that's why there was no difficulties for me and I dealt with everything with no problems. Professors were responsive and local students helpful. And of course I improved my English and communication skills.

I think that everyone should use this wonderful once-in-a-life time opportunity and accept the challenge of studies abroad while there is such possibility.

Trip to Budapest.

Every week country presentations took place. Representatives of the countries had to make video about their country and also offer typical food. In the picture – Latvian crew!

We also had a chance to make a video about our semester in Pecs, which included flash-mob and lip-dub which we created and staged all by ourselves. In the picture: scene from the flash-mob in the city center.

Big part of all exchange students (but not all of them) in the dormitory after finishing our final presentation/video.

Pecs City Carnival.
